PROFESSIONAL SUMMARY

Versatile UI/UX Designer, Manual QA Engineer, and Shopify & Web Developer with 1+ year of hands-on experience delivering end-to-end digital products. Proven record of reducing post-release defects by 30% and improving bug resolution efficiency by 15% through systematic testing and precise UI validation. Skilled in designing intuitive, responsive interfaces (Figma, Canva), building high-conversion Shopify stores with secure payment integrations, implementing technical SEO strategies (schema markup, sitemaps, on-page optimization), and writing basic Shopify Liquid code. Comfortable working with HTML, CSS, and React components (AI-assisted), with a strong design-to-deployment mindset. Open to remote and on-site opportunities across India.

SKILLS

UI/UX & Design: Figma · Canva · Affinity Designer · Wireframing & Prototyping · User Flow Mapping · Responsive & Mobile-First Design · Typography & Color Theory · Visual Design & Layout Principles

Web Development: HTML · CSS · Basic React (AI-assisted components) · Basic Shopify Liquid · Shopify Store Setup & Theme Customization · Payment Gateway Integration (Razorpay, Stripe, PayPal)

SEO: Technical SEO · On-Page Optimization · JSON-LD Schema Markup · XML Sitemaps · Meta Tags & Structured Data · Keyword Research · Page Speed Optimization

E-commerce: Shopify Product Catalog & Inventory Management · Checkout & Order Flow Configuration · Customer Journey Optimization · Conversion Rate Optimization

Manual QA & Testing: Functional · Regression · Smoke & Sanity · UI & Usability Testing · Cross-browser & Cross-device Testing · Performance & Load Testing (JMeter) · Test Case Design & Execution · Defect Logging & Tracking

Methodologies & Tools: SDLC · STLC · Agile / Scrum · Bug Reporting & Documentation · Microsoft Office Suite

Soft Skills: Analytical Thinking · Attention to Detail · Cross-functional Collaboration · Technical Documentation · Creative Problem Solving · Time Management

PROFESSIONAL EXPERIENCE

UI/UX Designer, QA Engineer & Web Developer | **MerlionTek, India** | Jan 2025 – Present

UI/UX & Graphic Design

- Designed user-centered web and e-commerce interfaces using Figma and Canva, improving visual consistency and user engagement across multiple client projects.
- Produced wireframes, high-fidelity prototypes, and user journey flows that reduced stakeholder revision cycles and accelerated developer handoff.
- Developed reusable graphic asset libraries — banners, icons, product creatives, and marketing materials — ensuring brand consistency across all digital touchpoints.
- Collaborated with developers to ensure pixel-perfect UI implementation, standardizing design documentation to reduce front-end rework.

Web & Shopify Development

- Built and launched a full-featured Shopify e-commerce store from scratch, including product catalog, variant management, cart, checkout, and automated order workflows.
- Integrated Razorpay payment gateway for secure, seamless transactions, improving checkout completion reliability.
- Wrote basic Shopify Liquid code for theme customizations, enabling tailored storefront experiences beyond default theme settings.
- Applied HTML and CSS to refine UI layouts and fix styling inconsistencies across web and e-commerce projects.
- Built basic React components (AI-assisted) to enhance interactivity and dynamic content rendering on web projects.

SEO Optimization

- Implemented technical SEO strategies including JSON-LD schema markup (LocalBusiness, WebSite, FAQPage), XML sitemaps, and structured metadata to improve search engine indexability.
- Conducted on-page SEO optimization — keyword research, meta tag configuration, heading hierarchy, and page speed improvements — contributing to improved organic visibility for client sites.
- Resolved SPA indexing issues for React/Vite-based sites by applying dual-content architecture techniques, ensuring crawler accessibility.

Manual QA & Software Testing

- Designed and executed 100+ structured manual test cases across 5+ client projects, covering functional, regression, smoke, sanity, and UI/usability testing.
- Identified, documented, and tracked 50+ critical defects, contributing to a 30% reduction in post-release production issues.
- Improved bug resolution efficiency by 15% through precise defect documentation and close cross-team collaboration.
- Performed cross-browser and cross-device regression testing — including mobile web and responsive layout validation — across multiple release cycles.
- Conducted load and stress testing using JMeter to validate application performance under peak traffic conditions.
- Contributed to QA process improvements by standardizing test report templates and defect reporting practices.

PROJECTS

LeaderClothings – Shopify E-commerce Platform | *Stack: Shopify, Figma, Canva, Razorpay, HTML, CSS*

- Designed the complete UI/UX from wireframes to high-fidelity Figma screens, focusing on mobile-first responsiveness and brand consistency.
- Built and configured the full Shopify store — product variants, inventory management, secure Razorpay checkout, and automated order processing.
- Applied on-page SEO best practices to product and collection pages, improving search engine discoverability.
- Executed functional and regression test suites post-deployment, ensuring a defect-free customer journey across desktop and mobile.

HSE Compliance Platforms – UAE & Qatar Clients (3 Projects) | *Stack: Web Application · Confidential / MerlionTek*

Three enterprise-grade Health, Safety & Environment (HSE) web platforms developed for clients in the UAE and Qatar, tested end-to-end across functional, regression, and mobile responsive scenarios.

- Executed comprehensive functional and regression test cases covering HSE compliance workflows, form validations, document uploads, and reporting modules.
- Performed mobile web and responsive layout testing across multiple devices and screen sizes, ensuring consistent UX for field and office users.
- Logged and tracked critical defects related to UI inconsistencies, data validation failures, and cross-browser rendering issues.
- Collaborated with developers to reproduce, prioritize, and verify bug fixes, maintaining high release quality across all three projects.

Customer Data & Collections Management Systems (2 Projects) | *Stack: Web Application · Confidential / MerlionTek*

Two internal web applications for managing customer records and tracking amount collections for business clients.

- Validated end-to-end workflows for customer data entry, record updates, and collection amount tracking, ensuring data accuracy and system reliability.
- Identified and reported defects in form submissions, calculation logic, and data persistence, reducing post-release issues.
- Conducted regression testing across iterative releases to maintain system stability as new features were added.

MerlionGame Station – CRM Data Entry & Client Management Portal | *Stack: CRM Web Application · MerlionTek*

- Tested core CRM workflows including client record creation, data entry forms, search and filter functions, and activity logging.
- Validated UI consistency and usability across desktop and mobile views, ensuring smooth day-to-day operational use.
- Reported and tracked UI and functional defects through the full defect lifecycle, from identification to closure.

EDUCATION

Bachelor of Engineering – Electrical and Electronics Engineering

Government College of Engineering, Dharmapuri, Tamil Nadu | 2018 – 2022 | 71.06%

CERTIFICATIONS

Software Testing Certification – MerlionTek (2024)

Covered manual testing techniques, test case design, defect reporting methodologies, and QA best practices aligned with industry STLC standards.
